

REMARKS

Claims 1-17, as amended, remain pending herein.

In the Advisory Action, the Examiner raised a new issue under § 112, second paragraph, alleging that claim 1, lines 5-6 is vague.

Parent claims 1 and 11 have been further amended to recite the ohmic contact as being "phototransparent." Such a contact is described on page 3, lines 13-16. Applicant courteously contends that the claims as amended now comply with § 112, second paragraph.

Attached hereto is a marked-up version of the changes made to the claims by the current amendment. The attached page is captioned "**Version with markings to show changes made.**"

Allowance of claims 1-17 is respectfully requested.

Respectfully submitted,

April 1, 2002

VERSION WITH MARKINGS TO SHOW CHANGES MADE

In the claims:

Claims 1 and 11 have been amended as follows:

1. (Twice Amended) A surface emitting laser, consisting essentially of:

a plurality of spaced apart mirrors;

a light amplifying region between said mirrors;

a substrate; and

a photon-transparent ohmic contact for passing light energy therethrough whereby light emission through said surface emitting laser may be monitored.

11. (Twice Amended) A method for monitoring light emission from a surface emitting

laser comprising:

providing a surface emitting laser as set forth in claim 1;

contacting said laser with a source of energy to generate light; and

monitoring emitted light transmitted through said photon-transparent ohmic contact.
